DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japan No. 61-24121 in view of Ballew, and further in view of Aksamit(US 4440045).

Japan('121) discloses a chainsaw sharpener comprising substantially all of the subject matter set forth in claim 1, except for the recitation of the wall faces having a substantial X-shape as seen in plan view. Ballew discloses a file guide having diverging walls to form a pair of opposed wall faces forming an X-shape as seen in plan view. To provide side wall faces on the lower surface of the guide body to aid in aligning the grinding tool with respect to the chain saw blade would have been obvious in view of Ballew.

Aksamit('045) discloses a chainsaw sharpener having guide wall faces which are pressed against a guide bar of the chainsaw to stabilize the sharpening tool during use. To simply extend the depending side wall faces on the chainsaw sharpening tool of Japan('121) to contact the chainsaw guide bar in order to stabilize the sharpening tool during use, for more precise sharpening of the cutting edges, would have been obvious in view of Aksamit('045).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hyde is cited of interest to show another chain saw sharpening tool having depending side walls which contact the chainsaw guide bar.

4. Applicant's arguments filed November 28, 2006 have been fully considered but they are not persuasive. Applicant's new limitation in claim 1, specifying that the wall faces are pressed against the guide bar of the chainsaw, is deemed to be obvious in view of Aksamit. Note in Aksamit('045) that the depending walls contact the guide bar of the chainsaw to stabilize the sharpening tool, and prevent the tool from wobbling.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
